EXPERIENCE

AI-SHIFU Remote
EdTech startup building an interactive, AI-powered platform and personal tutoring tool Winter 2025
Marketing Intern (New Product Launch)

- Co-led company's overseas market exploration with the marketing lead, translating audience insights into content recommendations for international outreach.
- Tested content topics and post lengths across approximately 20 Reddit posts in 10+ AI-related communities, identifying promising formats and audience interests to support organic social media marketing.

ACADEMIC RESEARCH PROJECTS (PUBLICATIONS | POSTERS)

Understanding How Adults with Recent Disabilities Navigate Acquisition Process Wellesley, MA
Primary Researcher | Advised by: Dr. Vinitha Gadiraju Spring - Fall 2025

- Developed technology design recommendations supporting patient labor, communication, and care navigation.
- Designed semi-structured interviews to explore technology adoption and needs among people with recently acquired disabilities.
- Strengthened recruitment quality by identifying fraudulent responses and developing screening questions, supporting reliable participant selection through trusted platforms.

Characterizing How People with Disabilities Use AI Chatbots Wellesley, MA
Primary Researcher | Advised by: Dr. Vinitha Gadiraju 2024 - 2025

- Analyzed 30 interviews and 16 diary entries to uncover user needs, chatbot use cases, and prompting strategies, informing two papers and design recommendations for more accessible and inclusive AI chatbots.
- Developed 10 diary-study prompts aligned with participants' routines to capture insights into everyday chatbot interactions.
- Managed recruitment and outreach with disability associations to build a diverse cohort and support inclusive data collection.

Exploring Intergenerational Communication in Chinese American Families Wellesley, MA
Primary Researcher | Advised by: Dr. Stephen H. Chen 2023 - 2026

- Streamlined the lab's participant tracking system in Notion to support research coordination, establishing a workflow that remains in use by the lab.
- Generated insights into how Chinese American parents and teens discuss social and racial topics through 20 in-depth interviews, adapting questions to elicit richer responses.
- Combined correlation analysis with deductive qualitative coding to identify relationships between family contentment and endorsement of the Asian American Success Frame.
